REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

30545.11

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,196,311, granted March 6, 2001 and for which a reissue patent is sought on the invention entitled UNIVERSAL CEMENTING PLUG

the specification of which

☐ is attached hereto.

☒ was filed on October 3, 2001 as reissue application number 09/970,432

and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The Patentee erred by not presenting claims during the prosecution of the patent which were directed to the subject matter set forth in the claims being presented up to and including the filing of this declaration, which error occurred without any deceptive intention on the part of the applicant. One error is that claims directed to a method for wiping the inner surface of a casing and a method for cementing a casing were not submitted. Another error is that claims directed to a cementing plug that includes a body member defining a central opening through the plug and a plurality of wiper cups extending from the plug for engaging an inner surface of the casing were not submitted. Yet another error is that certain independent claims in the patent, namely, claims 1, 8, 11, 19 and 31, did not require that the claimed cementing plug includes a plurality of wiper cups extending from a jacket disposed on or around a body member. Thus, the patent claims are directed to a scope that is more or less than what the patentee had a right to claim.
